

Mighty

Watches the loyalty and card accounts you already have — and tells you only when something is worth your time.

Get started

About five minutes to first setup. Disconnect anytime.

HOME

You're good.

Nothing needs you right now. Mighty is watching quietly in the background.

American Express

Find what you already have

Connect Gmail once. Mighty looks for known program mail — then you choose what to watch.

You stay in control

You sign into providers. Mighty helps and watches. Access can be disconnected anytime.

Quiet when you're clear

No dashboards full of noise. When nothing needs you, Home simply says you're good.

Primary CTA

Get started

User question

What is Mighty, and is it worth my time?

1 2 3 Create account

Create your Mighty account

Start with an email and password. You'll connect Gmail and Chrome later — with a clear explanation first.

Email

Password

Used only to sign into Mighty — not your airlines, hotels, or cards.

Create account

Nothing is connected yet. Creating an account does not grant mailbox or browser access. You can leave anytime.

User question

Did it work — and what happens now?

✓ ✓ 3 How Mighty works

How Mighty works

Mighty finds loyalty and card accounts from your email, keeps them current while you browse in Chrome, and only asks you to sign in when necessary. You stay in control.

What Mighty does

Watches accounts you already have and speaks up only when something needs you.

What you'll do

Connect Gmail once. Later, sign into providers yourself when asked. Use desktop Chrome when verification needs the browser.

What happens next

After Gmail, Mighty scans for known programs and shows what it found for your review — nothing is watched until you confirm.

WHAT WE USE Gmail FOR

- Finding loyalty and card relationships from program mail
- Matching known sender domains — not inventing accounts

WHAT WE WILL NOT DO

- Send email as you
- Ask you to store provider passwords in Mighty for discovery
- Sign into providers as you — you remain the operator

Connect Gmail

Add an account manually instead

You can disconnect Gmail later from settings. Manual add is always available.

4. How Mighty Works

Connect Gmail

User question

How does Mighty work, what will you ask for, and what won't you do?

INFORMED CONSENT · BEFORE GOOGLE

Connect Gmail to find your accounts

Mighty uses Gmail to discover loyalty and card accounts from your mail — not to manage your inbox.

- **Why we ask**

Program mail is the clearest signal of accounts you already have.

- **What you'll get**

A reviewable list of candidates — without a bulk “add every brand” checklist.

- **Limits**

Not for sending mail. Not for inbox management. Discovery looks for known program senders related to loyalty and cards.

- **What happens next**

After you approve with Google, Mighty scans and shows what it found. You choose what to watch.

Continue to Google

Not now

You can disconnect Gmail later. Prefer not to use mail? [Add an account manually.](#)

5. Connect Gmail

Primary CTA

Continue to Google

User question

Why Gmail — and what are the limits?

Looking for your accounts

Mighty is scanning your connected mail for known airlines, hotels, and card programs.

- ☒ Gmail connected
- ☒ **Matching known program senders**
- ☐ Preparing results for your review

This usually takes under a minute. You can leave and come back — progress continues. Mighty does not invent accounts while you wait.

[View results \(prototype\)](#)[Learn how discovery works](#)

6. Discovering Accounts

Primary CTA

None while scanning (wait)

User question

Is something happening — and how are you finding accounts?

DISCOVERY COMPLETE · YOUR CHOICE

Confirm what Mighty should watch

Here are accounts found from your mail. Confirm what you want Mighty to watch. Found does not mean logged in — balances appear after verification.

Matched from known program senders in your mail — not by reading unrelated personal messages as a product feature.

American Express

High confidence · Membership statement sender matched

Delta SkyMiles

High confidence · SkyMiles program mail matched

Marriott Bonvoy

High confidence · Bonvoy account mail matched

United MileagePlus

Optional · Lower confidence match — add only if this is yours

Start watching these accounts

I'll add accounts later

You can change this anytime on Accounts. Watching means Mighty will track these — it does not sign in for you.

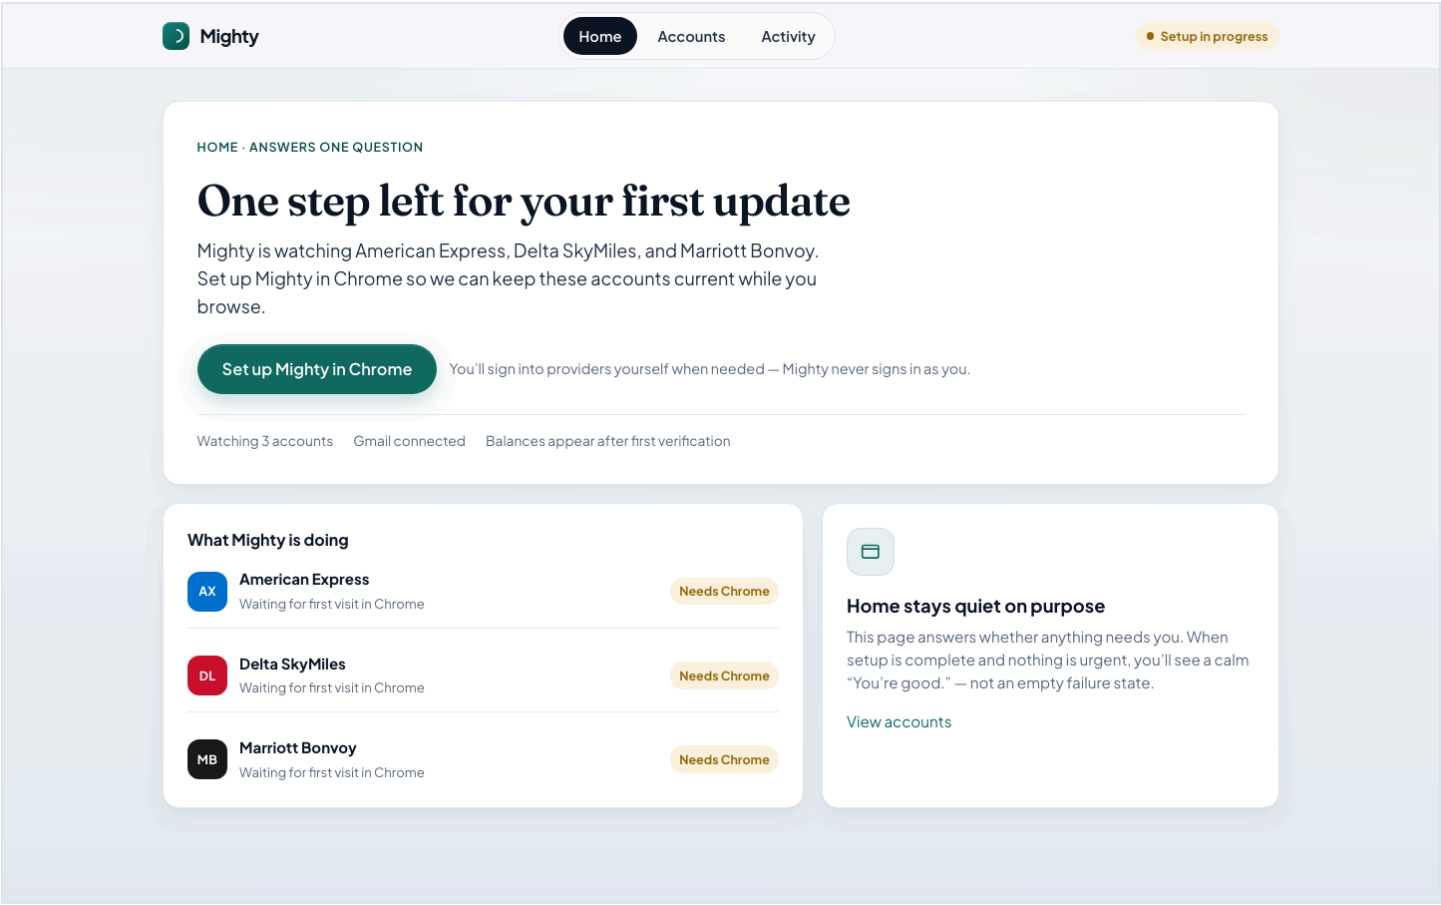

7. Review Accounts

Primary CTA

Start watching these accounts

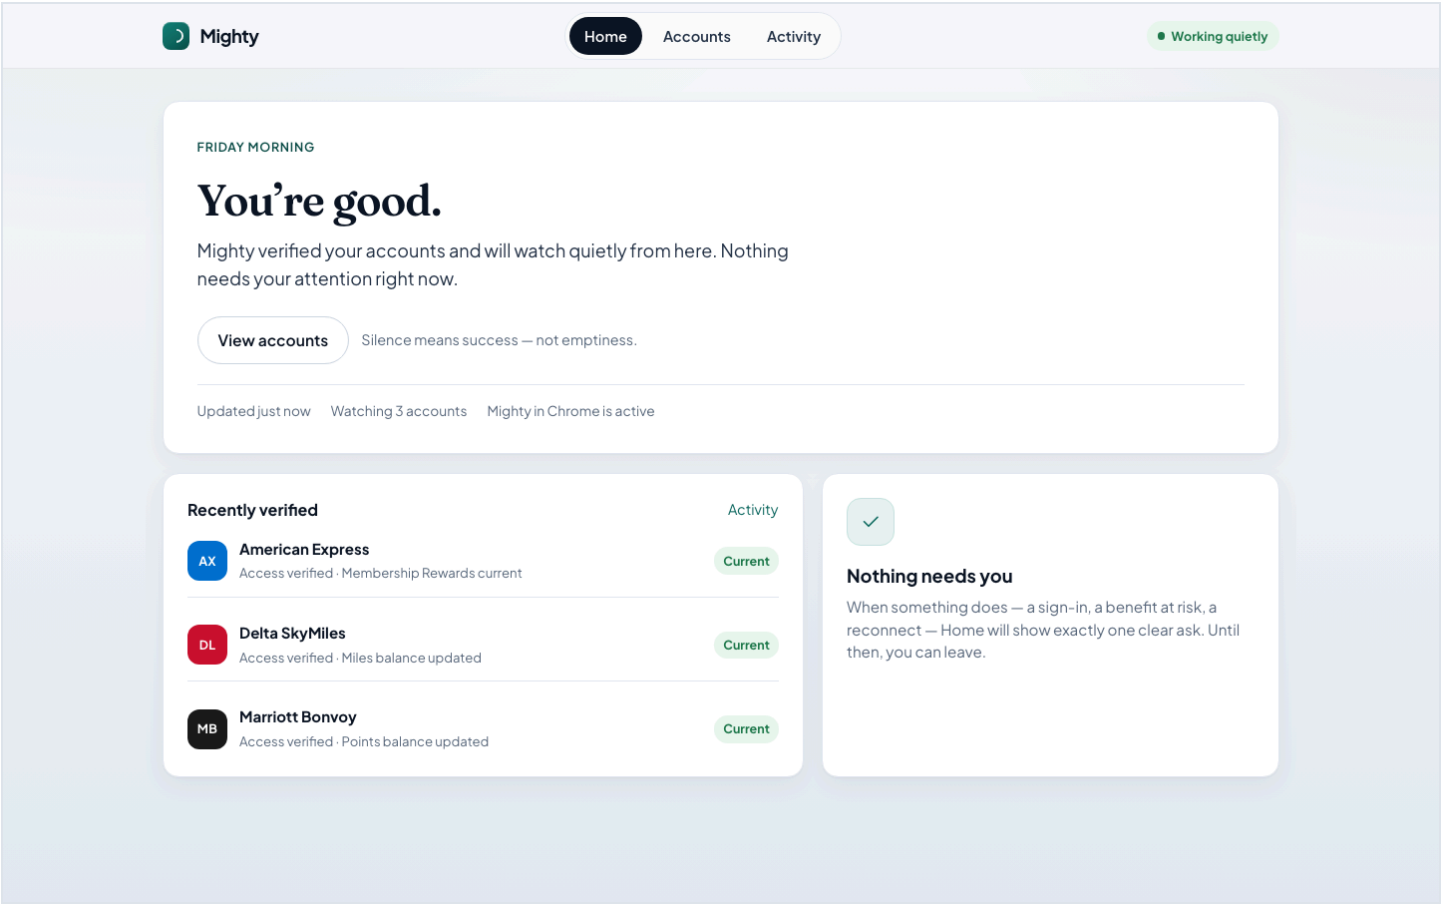

User question

What did you find — and what do I keep?

8. Home (Waiting)

Primary CTA	Set up Mighty in Chrome
User question	What do I do now — and is Mighty working?

9. Home (Healthy)

Primary CTA	None required (optional: View accounts)
User question	Did it work — and do I need to do anything else?

Accounts

Everything Mighty is watching. Status is honest: found, verified, and current are separate ideas.

Find more accounts

ACCOUNT	BALANCE	STATUS	
AX American Express Membership Rewards · Last checked just now	142,580 pts	Current	Details

What is Mighty watching?

Activity

When Mighty makes a claim that matters — found accounts, verified access, or asks for help — you can inspect what happened here.

American Express verified

Access confirmed after your sign-in on americanexpress.com. Membership Rewards balance updated.

Today · 8:42 AM

Delta SkyMiles verified

Access confirmed after your visit in Chrome. Miles balance updated.

Today · 8:38 AM

Started watching 3 accounts

You confirmed American Express, Delta SkyMiles, and Marriott Bonvoy after mail discovery.

Today · 8:21 AM

Found 4 account candidates from Gmail

Matched known program senders. United MileagePlus left unselected at your review.

Today · 8:19 AM

Gmail connected

Readonly discovery access granted. You can disconnect anytime from settings.

Today · 8:18 AM

No urgency theater

Activity is for evidence, not notifications spam. If nothing changed, this list stays quiet — the same way Home stays quiet when you're clear.
