

Mighty

Watches the loyalty and card accounts you already have — and tells you only when something is worth your time.

Get started

About five minutes to first setup. Disconnect anytime.

HOME

You're good.

Nothing needs you right now. Mighty is watching quietly in the background.

American Express

Marriott Bonvoy

Current

What it manages

Loyalty and card accounts you already have — found from program mail, then watched with your consent.

Why it's different

Home answers one question: does anything need you? When you're clear, Mighty stays quiet.

Why you can trust it

You stay in control. You sign into providers. Access can be disconnected anytime — explained before it's asked.

1. Landing Desktop

User question	What is Mighty, and is it worth my time?
Primary CTA	Get started
Motion / interaction	Field pulse / horizon breath behind "You're good."

1 2 3 Create account

Create your Mighty account

Start with an email and password. You'll connect Gmail and Chrome later — with a clear explanation first.

Email

Password

Used only to sign into Mighty — not your airlines, hotels, or cards.

Create account

Nothing is connected yet. Creating an account does not grant mailbox or browser access. You choose what to connect next — and you can leave anytime.

Primary CTA	Create account
Motion / interaction	Soft page-enter rise

1 2 3 Welcome

Welcome to Mighty

Your account is ready. Next we'll show how Mighty works, then help you find the accounts you already have — with no surprise permissions.

Continue

I already know how this works — you'll still get a short privacy preface before connecting.

3. Welcome Desktop

User question	Did it work — and what happens now?
Primary CTA	Continue
Motion / interaction	Welcome mark settle animation

How Mighty works

Mighty finds loyalty and card accounts from your email, keeps them current while you browse in Chrome, and only asks you to sign in when necessary. You stay in control.

WHAT MIGHTY DOES

- Finds accounts from known program mail
- Watches what you choose to keep
- Speaks up only when something needs you

WHAT YOU DO

- Connect Gmail once
- Confirm what to watch
- Sign into providers yourself when asked

WHAT MIGHTY NEVER DOES

- Send email as you
- Store provider passwords for discovery
- Sign into providers as you

What happens next: After Gmail, Mighty scans for known programs and shows what it found for your review — nothing is watched until you confirm.

[Connect Gmail](#)

[Add an account manually instead](#)

You can disconnect Gmail later from settings. Manual add is always available.

4. How Mighty Works Desktop

User question

How does Mighty work, what will you ask for, and what won't you do?

Primary CTA

Connect Gmail

Motion / interaction

Soft page-enter rise only

INFORMED CONSENT - BEFORE GOOGLE

Connect Gmail to find your accounts

Mighty uses Gmail to discover loyalty and card accounts from your mail — not to manage your inbox.

- **Why we ask**

Program mail is the clearest signal of accounts you already have.

- **What is accessed**

Mail metadata needed for discovery — such as known program senders and related account signals — in a readonly posture.

- **What is not accessed**

Mighty does not send email as you, manage your inbox, or use Gmail as a general-purpose reader of unrelated personal mail.

- **What is stored**

Account candidates and the evidence summaries needed to show why they were found — so you can review and decide.

- **What happens next**

After you approve with Google, Mighty scans and shows what it found. You choose what to watch.

- **How to disconnect**

You can disconnect Gmail later from Mighty settings, and revoke access in your Google account.

● HOME · ONE STEP REQUIRED

One step left for your first update

Mighty is watching American Express, Delta SkyMiles, and Marriott Bonvoy. Set up Mighty in Chrome so we can keep these accounts current while you browse.

[Set up Mighty in Chrome](#)

You'll sign into providers yourself when needed — Mighty never signs in as you.

Watching 3 accounts Gmail connected Balances appear after first verification

What's happening

MIGHTY'S WORK

Accounts are enrolled and waiting for the first natural visit in Chrome. No fake balances — status stays honest until verification.

YOUR REQUIRED ACTION

Set up Mighty in Chrome. That is the only step we can't complete for you right now.

AFTER YOU ACT

Visit a watched provider while signed in. Mighty verifies access and Home becomes a calm "You're good."

Active — not stalled

Waiting means Mighty has a clear next dependency on you. When setup is complete and nothing is urgent, this page will settle into quiet success — not an empty failure state.
